**World's largest capacity CO2 pipeline opens in Alberta**

The Alberta Carbon Trunk Line (ACTL) system, the world's newest — and said to be the largest capacity — carbon capture, utilization, and storage (CCUS) project, is now fully operational. The ACTL system captures industrial emissions and delivers the CO2 to mature oil and gas reservoirs in Central Alberta for use in enhanced oil recovery and permanent storage.

**Pulse valve lowers maintenance in reverse-jet dust collectors**

Emerson has announced its ASCO series 353 pulse valve has been redesigned to help OEMs and end-users achieve a more effective, efficient and convenient bag cleaning. With a higher peak pressure, wider temperature range, patented quick mount clamp connection and overall part simplification, the series is said to...
